

Best Practices for Deploying and Tuning the MicroStrategy Narrowcast Server

Overview:

This 1-day course is designed to provide students with the best practices guidelines for deploying, monitoring, and tuning their MicroStrategy Narrowcast Server™ implementation. Participants will first learn the recommended methodology for installing and configuring the various components that make up a Narrowcast Server system. Then, participants will learn best practices related to tuning Narrowcast Server, such as disabling 4 GT mode, leveraging Intelligence Server clustering, and applying different tuning strategies for personalized report and personalized page execution services. Finally, participants will learn how to configure the Narrowcast Server logging system and how to use the Enterprise Manager project to analyze Narrowcast Server activities.

Cost:

- £550 or 1 LU

MicroStrategy Products Covered:

- MicroStrategy Narrowcast Server
- MicroStrategy Enterprise Manager

Number of Days:

- 1 day

Who Should Attend:

- Narrowcast Server Administrators
- Infrastructure Leads
- Consultants
- Project Technical Lead
- Project Managers
- Project Developers

Prerequisites:

- MicroStrategy Desktop: Reporting Essentials course
- MicroStrategy Narrowcasting Essentials course
- MicroStrategy Enterprise Manager Essentials

Recommended Knowledge:

- MicroStrategy Advanced Narrowcasting course
- MicroStrategy Narrowcast Server Administration and Tuning

Topics:

- Introduction to Best Practices for Narrowcast Server
 - Course Overview
 - Course Layout
- Best Practices in Installing and Configuring Narrowcast Server
 - Narrowcast Server Configuration Scenarios
 - Narrowcast Server Installation Prerequisites
 - Best Practices for System Configuration
- Best Practices for Tuning Narrowcast Server
 - 4 GT Mode
 - Leveraging Intelligence Server Clustering with Narrowcast Server
 - Tuning Strategies for Personalized Report and Personalized Page Execution Services
- Best Practices for Monitoring Narrowcast Server
 - Understanding and Configuring the Narrowcast Server Logging System
 - Best Practices for Using Enterprise Manager with Narrowcast Server
