

MicroStrategy Web SDK: Portal Integration

Second Course in the:

- MicroStrategy Web Interface Designer Track

Overview:

This two-day course is geared towards individuals tasked with integrating MicroStrategy Web into their portals, using the MicroStrategy Software Development Kit (SDK). The course covers the portal terminology and concepts; portlet standards; portal architecture; typical portal implementation scenarios; portal integration methods; MicroStrategy portlet deployment, configuration and customization; and single sign-on with portals. The students will learn how to integrate MicroStrategy BI content within a portal using the URL API and how to customize the look and feel of MicroStrategy within a portal. The class combines lecture and hands-on practice.

Cost:

- £990 per person, or 2 LUs (1LU = £495)
